PRESS RELEASE

August 11, 2014

ALTO AVIATION introduces the new ACAPELLA™ SERIES of amplifiers.

A flexible, versatile and outstanding audio system designed to be installed in aircraft with or without existing CMS.

LEOMINSTER, MA. AUGUST 11, 2014.

Alto Aviation is pleased to announce the introduction of the new Acapella™ series of amplifiers. At just over 2 lbs., the light weight Acapella™ series of amplifiers are highly configurable, designed by ALTO Aviation engineers to seamlessly adapt and serve the most demanding cabin audio needs. The Acapella™ series of amplifiers are fully DO-160 tested, carry TSO- C139a certification and are available in several versions that provide customized combinations of features, including:

- 4 X 40 Watts of high-efficiency.
- Class-D audio amplifier output.
- Support for up to 6 pairs of headphones.
- Selection of up to 4 stereo inputs.
- Full PA Page/chime functionality.
- PA override input.

An integrated Digital Signal Processor contours the sound to provide the most optimal, powerful audio fidelity with no distortion. Discrete logic inputs support simple, flexible controls and facilitate easy installation.

The dual version of the amplifier expands the high power outputs to 8, and supports up to 10 pairs of headphones. The unit can be paired with ALTO's vast selection of loudspeakers or new control panel modules for a complete Acapella™ - stand-alone-audio system.

If you'd like more information or to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at 561-743-8600 / cscarlata@altoaviation.com.

About ALTO Aviation

ALTO Aviation is the premium cabin audio system supplier in the industry, serving customers worldwide. We are committed to research, design and develop new high-end performance audio components, and we provide a level of superior service that is second to none to our business aircraft customers.

Our years of experience in premium audio system development, as well as our flexibility and attention to detail have put us in a unique position to provide the highest audio technology to completion centers, business aircraft owners and manufacturers with the highest quality audio systems and customer service expertise.

Based in Leominster, MA. and Jupiter, FL., all our systems are proudly designed, engineered and manufactured in the US.

Audio designed with your *aircraft* in mind™
