ALTO Aviation introduces new ALTO VIP conference table microphone system for large cabin business aircraft.

Sterling, MA. July 20, 2016.

ALTO Aviation, the premier supplier of high-end cabin audio & entertainment systems for business aviation, is pleased to announce the expansion of their line of premier custom audio and entertainment solutions for Business Aviation by introducing their innovative ALTO aircraft conference table microphone system.

ALTO Aviation recently completed the installation and custom tune of a VIP aircraft conference table microphone system as part of a cabin audio upgrade to a Boeing 747 aircraft in Beijing, China.

The requirement was for a group of people around a large, nine (9) seat conference table to be able to converse during flight. The aircraft cabin noise made this impossible. ALTO Aviation audio systems engineers designed a complete microphone system including eleven (11) microphones with custom gold plated table connections, overhead loudspeakers, gold plated control panel, and an amplifier with advanced digital signal processing mounted under the table.

"Getting the system perfectly tuned and balanced such that every participant could be heard loud and clear without any noise or feedback was a real challenge" said Steve Scarlata, VP of engineering and R&D at ALTO Aviation. "We implemented some very complex signal processing which brought focus to the person talking while filtering out the ambient noise from all the microphones. As a result the participants can hold a meeting comfortably hearing everyone without having to shout or strain."

About ALTO Aviation

ALTO Aviation is the premier supplier of high-end cabin audio & entertainment systems for business aviation, which are offered as standard equipment on Gulfstream G650/650ER, G500/600, G450/550 Elite Series, G280, Falcon F7X, F900, F2000, Embraer Lineage, Legacy 650, 600, 500, 450, Cessna Citation X, Sovereign, and Latitude. ALTO is the preferred choice for after-market and retrofit installations for all business aircraft, small to large. All of our systems hold TSO certification.

Every ALTO audio system is custom designed and acoustically contoured specifically for each cabin installation. ALTO amplifiers and loudspeakers are expertly engineered to provide the highest level of sound performance at 40,000 feet, using the latest in digital technology. As a result, every passenger in the cabin gets transported into a powerful audio experience that rivals the best home and theater systems.

Everyone at ALTO is passionate about state-of-the-art sound, and our company is fully committed to providing each client with outstanding customer service and 24/7 support. ALTO Aviation corporate headquarters are located in Sterling, MA. The Engineering and R&D offices are located in Jupiter, FL. ALTO has Sales representation in Little Rock, AR, and Engineering Support for Europe in Stuttgart, Germany. All of our systems are proudly designed, engineered, and manufactured in the US and distributed worldwide.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at 978.466.5992 / cscarlata@altoaviation.com.
