DZ-290

4-Input Digital Amplifier with High Level Interface

The ALTO DZ-290 is a TSO-C139a certified 4 X 40W / channel Class D audio amplifier for aircraft cabin loudspeakers. This amp is specifically designed to interface with existing PA/Entertainment amplifiers having high level speaker outputs. Entertainment audio sources can be wired directly to the line inputs of the DZ-290 thereby bypassing the legacy PA/Ent amplifier, substantially improving audio quality and reducing noise and interference.

The amplifier supports discrete logic control and is compatible with the ALTO line of keypads, or any discrete control switches.

A PA Bypass feature allows the legacy PA system to override the entertainment during PA or Page/Chime events, making use of the same loudspeakers for PA and entertainment.
