PRESS RELEASE  
August 25, 2015

REVISED UPDATED VERSION For immediate release  
(Photos attached)

## ALTO Aviation introduces new Audio / Video System Solutions with Innovative Advantage AVDS

Sterling, MA. August 25, 2015.

ALTO Aviation is pleased to announce the expansion of its line of premium cabin entertainment systems, adding new fully integrated high-end custom audio / video solutions for Business Aviation.

ALTO Aviation has entered into an agreement with Innovative Advantage to use its AVDS nodes as an integral part of the ALTO audio/video solution. The AVDS is the most advanced highest performing video distribution system in the market. The AVDS supports video switching to multiple monitors in either Standard Definition or High Definition modes.

This solution provides the Business Aviation retrofit customers with the most advanced, cost-efficient cabin entertainment upgrade option. The result is a high-quality, full turnkey stand-alone IFE system specifically configured and designed to meet the highest audio / video expectations of each cabin.

ALTO Aviation designs each node specific to the aircraft system requirements and will provide each cabin with the appropriate configuration. The new ALTO Aviation integrated audio / video system combines ALTO Aviation superior audio components with Innovative Advantage's revolutionary AVDS. This solution offers an integrated audio / video control compatible with an industry monitor provider, ideal for single and multiple HD monitor upgrades. A cover bezel is available for the DECU replacement. This allows for new plating or accommodating a new flush mounted panel.

ALTO Aviation recently expanded its keypad offerings to add video selection to its list of functionality; this allows the passengers to select video to any desired monitor, whether it is a local personal monitor or bulkhead monitor. Two basic keypad styles are available, proud or flush mount. These keypads interface directly with the AVDS node and ALTO amplifiers to provide sequential video and audio control to the cabin audio system and monitors.

With the addition of the AVDS node and an onboard wireless Wi-Fi router, the audio and video system may be controlled by a personal device whether it is Apple or Android based. This flexibility allows passengers to use their personal device for A/V control.

"By far, the Innovative Advantage AVDS is the most comprehensive and advanced high-definition video solution in the market. Its ease of configuration and integration makes it an easy choice as our preferred method of video switching. We are thrilled to partner with Innovative Advantage to integrate our video button keypads and audio systems into one seamless package." Kevin Hayes, VP of Sales and Marketing said.

### About ALTO Aviation

ALTO Aviation is the premier supplier of high-end audio and entertainment systems for business aviation, offered as standard equipment on Gulfstream G650, G450/550 Elite Series, G280, Falcon F7X, F900, F2000, Embraer Lineage, Legacy 650, 600, 500, 450, Cessna Citation X, Sovereign, Latitude, and Sikorsky S-92, and S-70. ALTO Aviation is the preferred choice for after-market and retrofit installations for all business aircraft, small to large. All of our systems hold TSO certification.

Every ALTO audio system is custom designed and acoustically contoured specifically for each cabin installation. ALTO amplifiers and loudspeakers are expertly engineered to provide the highest level of sound performance at 40,000 feet, using the latest in digital technology. As a result, every passenger in the cabin gets transported into a powerful audio experience that rivals the best home and theater systems.

Everyone at ALTO is passionate about state-of-the-art sound, and our company is fully committed to providing each client with outstanding customer service and 24/7 support. ALTO Aviation corporate headquarters are located in Sterling, MA. The Engineering and R&D offices are located in Jupiter, FL. ALTO has Sales representation in Little Rock, AR, and Engineering Support for Europe in Stuttgart, Germany. All of our systems are proudly designed, engineered, and manufactured in the US, and distributed worldwide.
