PRESS RELEASE

March 25, 2019

ALTO Aviation introduces new Bluetooth Audio Interface Controller at the 62nd AEA International Convention & Trade Show in Palm Springs.

ALTO Aviation, an industry leader in cabin audio/entertainment systems, Cabin Management Systems (CMS), and Passenger Controls, has introduced a new line of Bluetooth™ audio products at the New Product Introductions Session on March 25th, 2019 at the 62nd Annual AEA International Convention & Trade Show at the Palm Springs, CA Convention Center.

Specifically designed for the aircraft cabin, the ALTO Bluetooth Audio Receiver BTR-300 is an audio receiver allowing the passenger to easily connect a Smartphone or Personal Electronic Device via a wireless connection to play crystal clear audio over the cabin IFE system.

The ALTO Bluetooth Audio Transmitter BTT-400 is an audio transmitter allowing the passenger to connect a pair of wireless Bluetooth headphones to the cabin IFE system, streaming the audio via A2DP.

Both products include an AptX Low Latency codec to ensure that there is no problem with lip sync while watching videos.

Other features include smart auto connection settings, provision for external indicator light and pairing switch, and signal mixing to allow concurrent wired audio input and headphone outputs. All ALTO products are fully DO-160 qualified and optimized for the highest possible

sound quality and reliability in the aircraft environment. These products will also feature FAA TSO approval.

“As industry leaders in budget-friendly Cabin Management Systems and In-Flight Entertainment, we know this is a perfect product fit to implement these customer-friendly interface methods to the aircraft. Just like pairing to your home audio, automobile or PED, our Bluetooth products allow the same level of flexibility with your aircraft audio system.” Kevin Hayes, VP Sales & Marketing at ALTO Aviation, said.

For more information, please visit ALTO Aviation at booth # 930.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in the design and manufacture of high-end cabin audio & entertainment systems for all aircraft type in Business Aviation. Our products and solutions, which include Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
