PRESS RELEASE

October 22, 2019

ALTO Aviation introduces new articulating arm tablet holder

ALTO Aviation, an industry leader in cabin audio/entertainment systems, Cabin Management Systems (CMS), and Passenger Controls has expanded its Cabin Management and In-Flight Entertainment control solutions by introducing a new articulating and adjustable arm tablet holder designed with simplicity in mind.

In a strategic partnership with MyGoFlight, maker of premium iPad and tablet gear for pilots, ALTO Aviation offers a base mount that is 100% fit compatible with Rosen plug-In bases. The universal mount is designed to drop into Rosen circular Micro D-Sub or Pogo Pin existing bases; it is fully compatible with all MGF devices holders, allowing an array of mounting provisions for various passenger devices.

This new tablet arm articulates in any direction and consists of three independent joints that are adjustable and lockable from a single, centrally located control knob. The control knob allows for partial loosening and precise device positioning. You define the orientation of your tablet and lock into place. Once locked, it securely stays in position with no compromises.

“As cabin entertainment systems continue to evolve toward the integration of personal electronic devices (PED), it was a natural extension for ALTO to offer a straightforward and affordable tablet arm holder that leverages existing bases located in the aircraft. It supports our philosophy of keeping the existing furnishings intact and adding an elegant hands-free device with no modifications to the cabin. Our arm is fully articulating and is adaptable to any PED in

the market, providing convenience and carefree operation to our customers.” Kevin Hayes, VP of Sales and Marketing, said.

The ALTO Aviation team is located at booth # N4631.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in the design and manufacture of high-end cabin audio & entertainment systems for all aircraft type in Business Aviation. Our products and solutions, which include Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com

About MyGo Flight

MyGoFlight builds iPad and tablet gear for pilots. MyGoFlight’s cases, mounts, flight bags and accessories are well-made and make using the iPad or tablet in the cockpit safer, easier, and secure. MyGoFlight products help pilots more effectively integrate their device seamlessly into the flight deck. All professional grade. All built to last. MyGoFlight’s modern flight bags are the first designed to protect the iPad or tablet and make storing and accessing gear simple. MyGoFlight products are highly functional. Perfect for the airplane and everyday use.
