PRESS RELEASE

October 22, 2019

ALTO Aviation introduces new source equipment trim plate.

ALTO Aviation, an industry leader in cabin audio/entertainment systems, Cabin Management Systems (CMS), and Passenger Controls has launched a new source equipment trim plate that replaces traditional single DIN packaged units with a fit compatible plate with Bluetooth provisions at NBAA-BACE 2019 in Las Vegas.

With the proliferation of Personal Electronic Devices with no headphone jacks, ALTO Aviation has defined a Bluetooth product that allows pairing to the In-Flight Entertainment system of the aircraft, weather new or existing. ALTO's new trim plate adapts to the actual hole size, minimizing the amount of effort to update legacy systems.

"As a part of our *simplify* philosophy, we continue to develop simple fit compatible solutions to add Bluetooth capability to existing or new IFE systems. ALTO's new source equipment trim plate adapter is just another example of our forward-thinking methodology. Keeping things simple for our customers by providing them with premium cabin solutions designed with simplicity and outstanding performance in mind". Kevin Hayes, ALTO Aviation VP of Sales and Marketing said.

The ALTO Aviation team is located at booth # N4631.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in the design and manufacture of high-end cabin audio & entertainment systems for all aircraft type in Business Aviation. Our products and solutions, which include Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
