PRESS RELEASE

August 18, 2020

ALTO Aviation celebrates its 100th Cadence™ Switch Series installation.

ALTO Aviation, an industry leader in premium cabin audio systems, In-Flight Entertainment (IFE), Cabin Management Systems (CMS), and Passenger Controls, is pleased to announce a new milestone: ALTO Cadence™ Switch Series solution has been installed in over one hundred business jets.

Cadence™ Switch Series (CSS) is ALTO Aviation's series of customizable cabin switch panels that allow functionality through discrete logic and no software, minimizing or eliminating woodwork and considerably reducing installation costs. The foundation for CSS is modular, discrete switch assemblies. The modules come in sizes from 1-6 positions and include USB charging, HDMI port, Bluetooth interface, and ordinance signage. CSS is fit compatible with former CMS/IFE switch offerings. By defining a bezel that fits an existing cutout, ALTO may be able to provide a CMS/IFE upgrade solution without changing the woodwork.

All installations have been customized explicitly for retrofit aircraft to replace their obsolete, non-serviceable, or broken passenger controls, in many cases repurposing functionality and updating the Cabin Management System capabilities of each cabin.

Many leading MROs in Business Aviation have installed ALTO Cadence™ Switch Series in a wide variety of private aircraft, including light jets and turboprops, medium, large, bizliner cabin, and special mission aircraft.

"We are proud of surpassing our 100th unique aircraft Cadence™ Switch System project milestone. The Cadence™ Switch Series (CSS) has been instrumental in satisfying the replacement requirements of legacy systems. What an accomplishment for the ALTO team. We appreciate all the customers who have supported us and continue supporting us along this journey and look forward to many more installations in the future." says Kevin Hayes, VP Sales, and Marketing at ALTO Aviation.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in the design and manufacture of high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, which include Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
