PRESS RELEASE

Please release on December 2, 2020 (VBACE)

ALTO Aviation introduces its new ALTO 3D Immersive Media Zone Audio System customized for Medium, Large, and VVIP Business jets.

ALTO Aviation, a leader in premium cabin In-Flight Audio and Entertainment systems in Business Aviation, has introduced their new ALTO 3D Immersive Media Zone audio system. There has been an increase in customer requests for a large credenza mounted video monitor across a 4-place seating group or luxury divan in medium, large, and VVIP business jets.

This is the perfect environment for a fully immersive audio and Video entertainment experience ideal for music, movies, and video gaming, featuring a 6.2 channel, 3-D Immersive sound experience that is unrivaled in any aircraft, vehicle, or home system. The front stage is set with PSU mounted Left, Center, and Right loudspeakers.

The immersive surround image is provided by Surround-Left, Surround-Center, and Surround-Right loudspeakers mounted behind the passengers. Two Powerful and compact subwoofers mounted beneath the seats or divan or bulkheads provide ample bass for lifelike impact. The high-efficiency ALTO Class-D amplifier with advanced digital signal processing is the final touch making the speakers disappear and immersing the listener in sonic perfection.

The new ALTO 3D Immersive Media Zone Audio System is currently available in select OEM offerings; it can be seamlessly installed in any retrofit project with minimal work and full integration with the unique interior design concept of each cabin.

"I am very proud of everyone on the ALTO team. Our R&D and engineering divisions designed the new ALTO 3D immersive audio system to provide the most powerful and amazing audiophile

experience in the media zone of the cabin. The result is outstanding. The sound is crystal-clear, and the 3D immersive experience is unrivaled in our industry. We are confident that we will wow our customers with this top-notch audiophile entertainment offering.” - said Steve Scarlata, ALTO Aviation VP Engineering / R&D

About ALTO Aviation

ALTO Aviation is an aerospace industry leader who designs and manufactures high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, including Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems, are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
