PRESS RELEASE

Please release on December 2, 2020 (VBACE)

ALTO Aviation introduces new ALTO On-Demand Audio Optimization.

ALTO Aviation, a leader in premium cabin In-Flight Audio and Entertainment systems in Business Aviation, has introduced its new ALTO On-Demand Audio Optimization feature.

ALTO is well known for its ability to provide every seat in the aircraft with life-like, realistic, and dynamic audio quality with smooth and powerful bass response.

The On-Demand Audio Optimization feature allows a particular seat or section of the aircraft to receive the VIP Audio treatment. At the touch of a button or swipe on the Alto remote control app, the selected seat can be placed right at the center of the action. The bass from all the subwoofer can be digitally focused for maximum impact.

The Mid-High speakers are time-aligned and individually equalized for a perfect sweet spot at the VIP's ears. The speakers behind the VIP seat can provide the surround channels for an ideal surround sound cinema immersion.

"Our new System Master Controller will be able to dynamically control the DSP in our amplifiers to set up custom EQ configurations on demand. The sound profiles can reflect a VIP seat eccentric audio configuration setting, including surround sound and spatially balanced speakers. This approach will allow us to retroactively repurpose previous ALTO audio systems with these new features with minimal changes to the architecture." Kevin Hayes, ALTO Aviation VP Sales & Marketing stated.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader who designs and manufactures high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, including Inflight Entertainment Systems, Public Address Systems, and Cabin Management Systems, are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
