PRESS RELEASE

Please release on December 3, 2020 (VBACE)

ALTO Aviation partners with Jet East Aviation to provide Bluetooth® audio receivers for an aircraft fleet operator.

ALTO Aviation, a leader in premium cabin In-Flight Audio and Entertainment systems in Business Aviation, through its dealer partnership with Jet East Aviation, has been contracted to supply their ALTO BTR-300 Bluetooth® receivers with remote pairing switches in an undisclosed customer's aircraft fleet.

The ALTO Bluetooth® receiver is programmed with a custom name selected by the end customer to display on the passenger's Personal Electronics Device (PED) when they board the aircraft. When boarding for the first time, the passenger selects the custom-named Bluetooth® Audio device, presses the pairing button, and once paired to the receiver; they will be able to listen to their playlists through the aircraft audio system. Future sessions will automatically connect once the PED has been initially paired.

Jet East Aviation engineered and designed an aesthetically pleasing installation that includes rear mounting the ALTO Bluetooth® pairing switch module into an existing bezel at the VIP seat location. This design approach provides the impression that the Bluetooth® system was part of the original equipment installation.

"We are very pleased to have been chosen by Jet East and their customer to provide them with our Bluetooth® retrofit system. The selection process included a thorough evaluation that entailed several months of testing prior to the contract award. We were also very impressed with the Jet East Management and Engineering team in their design approach and installation of the initial ship sets," stated Steve Lord, ALTO Senior Technical Sales Manager.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader who designs and manufactures high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, including In-Flight Entertainment Systems, Public Address Systems, and Cabin Management Systems, are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

About Jet East Aviation

Jet East, one of the nation's leading aviation maintenance providers, is headquartered in Trenton, New Jersey. The company specializes in scheduled maintenance, on-demand mobile maintenance for unscheduled events, and provides related services in the areas of structural repairs, composite work, non-destructive testing (NDT) and paint capabilities. With a long-standing history in the area of AOG mobile maintenance and a deeply talented workforce, Jet East has a significant presence in the Northeast, Mid West and Great Lakes regions of the United States. Though heavily concentrated in the Northeast corridor, the company provides service across the U.S. and in certain international markets. Maintenance hangars in New York and New Jersey and a back shop in Ohio compliment the company's strength in mobile maintenance by offering a team of dedicated technicians for scheduled maintenance and off-wing services.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
