PRESS RELEASE

January 14, 2021

ALTO Aviation launches its new 2021 ALTO Cadence™ upgrade programs

ALTO Aviation, a leader in premium cabin In-Flight Audio and Entertainment systems in Business Aviation, has launched its new 2021 In-Flight Entertainment and Cadence™ Cabin Management System upgrade programs specifically customized for all retrofit business aircraft.

The 2021 ALTO Cadence™ upgrade programs offer various non-compromise, budget-friendly cabin audio, and entertainment upgrades. Includes a wide selection of direct replacement and fit compatible passenger controls and bezels. All the solutions are designed to preserve your wood and furnishing and serve all styles, including the Micronet round, squared, raised oval button, and the concave curved side ledge panels.

The upgrades offer the possibility of easy integration or full replacement of the existing Cabin Management System in the aircraft with ALTO's new System Master Controller. This intuitive module seamlessly links aircraft Cabin Management System components with various communication protocols together.

All ALTO's 2021 upgrade programs have a convenient modular approach, allowing scaling the upgrades to meet and exceed each aircraft's exact requirements efficiently. Some of the features include enabling easy removal of headphone functionality, replacing them with blanking plates, repurposing the panels with USB, adding local Read-Table lighting to the former headphone locations, and eliminating the former PSU panels, all within the constraints of the original panel. This simple design step eliminates nearly 40% of the existing panels, resulting in significantly lower installation costs.

"The new 2021 ALTO In-Flight Entertainment and Cadence™ Cabin Management System solutions for retrofit business aircraft allowed us to meet the highest demands of our customers

in a very budget-friendly, modular approach without any compromise of quality in the performance and trusted excellent customer support from our team. We look forward to continuing providing innovative solutions designed with simplicity in mind for the retrofit aircraft." – Kevin Hayes, VP of Sales & Marketing, said.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in designing and manufacturing high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, including Inflight Entertainment Systems, Public Address Systems, and Cadence™ Cabin Management Systems, are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at cscarlata@altoaviation.com
