## PRESS RELEASE

**June 21, 2021**

### **ALTO Aviation celebrates over two hundred and fifty (250) Cadence™ Switch Series installations.**

ALTO Aviation, an industry leader in premium cabin audio systems, In-Flight Entertainment (IFE), Cabin Management Systems (CMS), and Passenger Controls, has announced a new company milestone at the 64<sup>th</sup> Annual AEA International Convention and Trade Show in Dallas: ALTO Cadence™ Switch Series has been installed in over two hundred and fifty (250) business jets including Gulfstream, Falcon, Bombardier, and Citation aircraft.

Cadence™ Switch Series (CSS) is ALTO Aviation's series of customizable cabin switch panels that allow functionality through discrete logic and no software, minimizing or eliminating woodwork and considerably reducing installation costs. The foundation for CSS is modular, discrete switch assemblies. The modules come in sizes from 1-6 positions and include USB charging, HDMI port, Bluetooth interface, and ordinance signage. CSS is fit compatible with former CMS/IFE switch offerings. By defining a bezel that fits an existing cutout, ALTO may be able to provide a CMS/IFE upgrade solution without changing the woodwork.

All installations have been customized explicitly for retrofit aircraft to replace their obsolete, non-serviceable, or broken passenger controls, in many cases repurposing functionality and updating the Cabin Management System capabilities of each cabin, representing solutions with over thirty (30) different switch series for obsolete CMS.

Many leading MROs in Business Aviation have installed ALTO Cadence™ Switch Series in a wide variety of private aircraft, including light jets and turboprops, medium, large, bizliner cabin, and special mission aircraft.

“Everyone on the ALTO team is proud of surpassing our 250th unique aircraft Cadence™ Switch System project milestone. This represents solutions with over 30 different switch series for obsolete CMS. The Cadence™ Switch Series (CSS) has been instrumental in satisfying the replacement requirements of legacy systems. Listening and responding to our customers allows us to deliver performance-driven results with supportable solutions for years to come.” says Kevin Hayes, VP Sales and Marketing at ALTO Aviation.

### **About ALTO Aviation**

ALTO Aviation is an aerospace industry leader designing and manufacturing high-end cabin audio & entertainment systems for all aircraft in Business Aviation. Our products and solutions, including Inflight Entertainment Systems, Public Address Systems, and Cadence™ Cabin Management Systems, are sold to OEM and retrofit companies in the business aviation industry and installed in corporate/private/VIP jets and helicopters. ALTO also manufactures precision sheet metal and machined parts for multiple industries in addition to aerospace.

If you would like more information or would like to schedule an interview with one of our ALTO Aviation representatives, please contact Cristina Scarlata at [cscarlata@altoaviation.com](mailto:cscarlata@altoaviation.com)
