PRESS RELEASE

October 12, 2021

ALTO Aviation unveils new ALTO Cadence™ Galley Control System

ALTO Aviation, an industry leader in premium cabin audio systems, In-Flight Entertainment (IFE), Cabin Management Systems (CMS), and Passenger Controls, has introduced its new galley touchscreen to their ALTO Cabin Control App at the 2021 NBAA Business Aviation Convention Exhibition in Las Vegas (booth #1621).

Cadence™ Switch Panels are ALTO Aviation's direct replacement and customizable cabin passenger controls that allow functionality through discrete logic and no software, minimizing or eliminating woodwork by defining bezels that fit into the existing holes, considerably reducing installation costs.

The foundation for Cadence™ is modular, discrete switch assemblies. The modules range from one (1) to six (6) positions, including USB charging, HDMI port, Bluetooth interface, and ordinance signage. Cadence™ is compatible with the aircraft's existing Cabin Management System and In-Flight Entertainment System. Additionally, by defining a bezel that fits into an existing cutout, ALTO provides a CMS/IFE upgrade solution without changing the woodwork.

All installations were customized to replace the obsolete, non-serviceable, or broken passenger controls, as well as new installations, in many cases repurposing functionality and updating the Cabin Management System capabilities of each cabin.

Many leading MROs in Business Aviation have installed ALTO Cadence™ Switch Series in a wide variety of private aircraft, including light jets and turboprops, medium, large, bizliner cabin, and special mission aircraft.

“We are so excited about this new milestone in our company. We have surpassed 300 Cadence™ Switch Panels with unique, customized solutions for our clients, impeccably installed by top MROs worldwide in a wide variety of aircraft, including Gulfstream, Falcon, Citation, and Bombardier. In addition, we continue designing, manufacturing in-house, and customizing passenger controls that provide easy and fast installations with unrivaled performance.” says Kevin Hayes, VP Sales, and Marketing at ALTO Aviation.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in premium cabin audio systems and cabin passenger controls. Our team designs, manufacture, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation.

Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide.

ALTO cabin systems engineers tune each cabin onsite for maximum optimization of each installation. Over 5,000 business jets fly with ALTO Aviation components. ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries.
