PRESS RELEASE

ALTO Aviation introduces new Cadence™ Galley Touch Panel

ALTO Aviation, a leader in premium cabin In-Flight Audio and Entertainment systems in Business Aviation, has expanded its Cadence™ Cabin Management offering by introducing the new Cadence™ Galley Touch Panel at the 2021 NBAA-BACE convention & trade show.

The 10-inch panel can be mounted in a portrait or landscape orientation; it is designed with an intuitive and elegant interface for controlling all aircraft functions and equipment; these include all lighting, IFE, power, galley appliances, attendant call, shades, climate, flight information, and system settings.

The user interface is based around ALTO Cabin Control App and is customizable for each installation and customer requirement. Additionally, the Cadence™ Galley Touch Panel can also be duplicated and run on one or more devices such as an iPad, Android tablet, or any MS Windows device; this allows the flight crew to access Cadence™ Galley Touch Panel functions from anywhere in the aircraft as well as providing a valuable level of redundancy for critical cabin controls.

“The new ALTO Cadence™ Galley Touch Panel is a great addition to ALTO Cabin Management System; designed in-house with simplicity, functionality, and performance in mind this new product provides an additional option for an easy and fast replacement of obsolete legacy galley switch panels and can add numerous valuable features to any cabin upgrade,” said Steve Scarlata, ALTO Aviation VP Engineering / R&D

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in premium cabin audio systems and cabin passenger controls. Our team designs, manufacture, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation.

Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide.

ALTO cabin systems engineers tune each cabin onsite for maximum optimization of each installation. Over 5,000 business jets fly with ALTO Aviation components. ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries.
