PRESS RELEASE

December 3, 2021

ALTO Aviation introduces new 2022 Public Address (PA) and Passenger Entertainment Audio System Upgrade Program for Embraer Phenom 100 and Phenom 300 aircraft.

ALTO Aviation, an industry-leading supplier in premium cabin audio systems, Cabin Management Systems, and Passenger Controls, has introduced their new 2022 Public Address (PA) and Passenger Entertainment Audio System specifically designed and customized for Embraer's light jet Phenom 100 and Phenom 300 in mind.

ALTO Aviation cabin systems engineers have developed a PA system that employs a digital amplifier, and 100% fit compatible speakers for mounting in factory-provided speaker locations on all legacy Phenom 100 and 300 aircraft. This innovative solution allows the pilot to communicate with great acoustic quality safety messages and announcements to the passengers in the cabin who are not wearing intercom headphones.

The ALTO Phenom PA system with PA/chimes is specifically designed to provide Phenom 100 & 300 operators with an important safety feature that was never offered as part of the original Embraer Phenom factory completion.

The flight crew can make PA announcements from the cockpit by selecting the existing PA button on the audio panel. A PA chime will activate when the microphone is keyed, and the crew can make clear announcements to passengers without requiring them to wear headphones.

This versatile solution also adds excellent entertainment audio to aircraft with an Embraer audio system installed and will provide all the cabin passengers with an outstanding listening experience. Passengers can plug in their personal media device or connect to an optional ALTO Bluetooth receiver

and listen to their favorite music through a customized ALTO Aviation premium digital sound system. PA announcements override any entertainment audio playing during the PA event.

"I am always very excited offering all our clients' solutions exclusively designed with their aircraft in mind. The 2022 PA/Entertainment Audio Upgrade program allows Phenom operators to invest in safety with a premium airline-quality PA system, and easily add amazing entertainment audio for their passengers to enjoy by upgrading to a powerful ALTO audio system.", says Steve Lord, Senior Technical Sales Manager & Embraer Program Specialist at ALTO Aviation.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in premium cabin audio systems and cabin passenger controls. Our team designs, manufacture, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation.

Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide.

ALTO cabin systems engineers tune each cabin onsite for maximum installation optimization. Over 5,000 business jets fly with ALTO Aviation components. ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries.
