PRESS RELEASE

Sterling, MA, August 17, 2022

ALTO Aviation introduces new Cadence™ passenger controls replacement program for retrofit Falcon 900B and Gulfstream GIV aircraft.

ALTO Aviation, an aerospace industry leader in premium certified cabin audio systems and passenger controls for all aircraft Business Aviation aircraft, has introduced a new Cadence™ direct replacement/upgrade program to solve passenger control obsolescence in retrofit Falcon 900B, older Gulfstream GIV, and other aftermarket aircraft equipped with non-serviceable Baker DECU switch panels.

The new Cadence™ solution, made in the USA, replaces and upgrades the obsolete Baker DECU with a drop-in, fit-compatible unit that does not require wood modifications. The replacement upgrades functionality by adding USB-A or USB-C charging ports, 15W, 3A output. The existing wiring may power the charging ports, pending wire gauge and circuit breaker review. The new unit utilizes True Blue Power TA-202 supply with limited lifetime warranty.

The design covers up the screws held in the unit. Clear or black anodized bezels are available at no additional charge. Read table and option for Bluetooth® headphones is available. Pending production loading, the Cadence™ panel replacement may be supplied in two weeks or less.

"ALTO saw an opportunity to provide customers with a viable alternative to the obsolete Baker DECU. This ALTO solution transforms a nonfunctional unit into a customer-valued added USB-A or USB-C charging port. Utilizing ALTO direct fit-compatible approach, the Cadence™ replacement fits into the same cutout and may use the same wiring that powered the DECU unit. In addition, the replacement is installation-friendly and increases user value by adding USB charging within the same profile." Kevin Hayes, VP of Sales & Marketing, said.

About ALTO Aviation

ALTO Aviation is a top-tier provider of premium listening experiences celebrating 25 years of serving the Business Aviation industry. Our in-house team designs, manufacture, and distributes premium certified cabin audio systems and cabin control solutions for all aircraft types in Business Aviation.

Our solutions include Digital Surround Sound, Immersive 3D audio ALTO Soundstage™, ALTO MySound™, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved, sold to most major OEMs, and successfully installed by leading MRO companies worldwide.

ALTO Cabin Audio Systems are standard OEM equipment on Gulfstream G700, G600, G650ER, G650, and G280, Falcon F8X, F7X, F6X, F900, F2000, Embraer Praetor 600, Praetor 500, Cessna Citation Latitude, Longitude, Airbus 330 upper-level lounge speakers, HondaJet, Bell Helicopters PA Speakers, and Sikorsky S-92.

In addition, ALTO cabin systems engineers tune each cabin on-site for maximum installation optimization. Over 5,000 business jets fly with ALTO Aviation components. ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries. ALTO Aviation's corporate headquarters are located in Sterling, MA. All our cabin solutions are proudly designed, engineered, manufactured in the USA, and distributed worldwide.
