PRESS RELEASE

ALTO Aviation announces company milestone with 100 Bombardier Global Express aftermarket installations featuring digital ALTO Sound and Cadence™ Switch Panels.

Sterling, MA - November 15, 2022

ALTO Aviation, a leader in premium cabin audio systems and cabin control for all business aircraft, celebrating twenty-five years serving the business aviation industry, has announced a new company milestone, recently reaching one hundred Bombardier Global Express aftermarket aircraft upgraded with certified ALTO cabin digital audio systems and Cadence™ switch panels.

The digital audio upgrades have provided these aircraft with customized ALTO Sound for each sitting area, ALTO premium digital surround sound, and immersive acoustic areas tailored to the specifications of each aircraft.

ALTO's audio components and Cadence™ switch panels have been seamlessly installed by a wide variety of ALTO Aviation authorized dealers worldwide, with most installations performed by AMAC, Bombardier, Duncan Aviation, Flying Colours, GEF Aviation, Pro Star, Standard Aero, and West Star.

The Cadence™ cabin control upgrades include direct replacement of legacy Baker/Honeywell, Audio International, and Lufthansa Technik, eliminating woodwork by fitting the new panels in the existing cutouts.

Most aircraft included cabin control upgrades such as Bluetooth audio, USB/HDMI ports, and tailored functionality, also available for control through the ALTO cabin control app.

"We can't be prouder of this very significant milestone for our company. We thank all our authorized installers for making it possible by selecting ALTO for their digital audio and cabin control upgrades. We continue our strong commitment to delivering great sound and cabin control solutions specifically designed for Bombardier Global Express with simplicity and performance in mind. It makes us happy knowing that our drop-in, lightweight replacement mid/high loudspeakers subwoofers help our customers reduce labor costs, resulting in budget-friendly solutions that enhance the passengers' experience and increase the aircraft's value." Kevin Hayes, ALTO Aviation Vice President of Sales and Marketing, said.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader in designing and manufacturing high-end cabin audio & entertainment systems for all aircraft in Business Aviation with 25 years of experience in Business Aviation. Our products and solutions include customized premium ALTO MySound™, Inflight Entertainment Systems, Direct Replacement Passenger Controls, Public Address Systems, Bluetooth® audio, Cadence™ Cabin Management System, System Master Controllers, and ALTO Cabin Control App, sold to most major OEM and installed by authorized retrofit companies in corporate/private/VIP jets helicopters, military, and special mission aircraft. ALTO also manufactures precision sheet metal and machined parts for multiple industries and aerospace.
