## PRESS RELEASE

### **ALTO Aviation reaches over Two Hundred and Fifty (250) Gulfstream aircraft aftermarket installations featuring customized ALTO Sound and Cadence™ Switch Panels.**

Sterling, MA – July 10, 2023

ALTO Aviation, a leader in premium cabin audio systems and cabin control for all business aircraft, celebrating twenty-five years serving the business aviation industry, has announced a new company's milestone, recently reaching over two hundred and fifty (250) Gulfstream aftermarket aircraft upgraded with certified ALTO cabin digital audio systems and Cadence™ switch panels.

ALTO's cabin audio systems are standard equipment on all Gulfstream OEM aircraft models and are the preferred choice for aftermarket upgrades on all Gulfstream jets, including Gulfstream GV/550, GIV/450/400, GIII/300, G200, G150, and G100/Astra models.

The digital audio upgrades have provided these aircraft with customized ALTO Sound engineered with each aircraft's specifications in mind, providing ALTO Premium nVELOP™ digital surround sound, ALTO MySound™, ALTO Soundstage™ immersive sound, and acoustic solutions controlled with Cadence™ switch panels, and ALTO Cabin Control app.

ALTO's audio components and Cadence™ switch panels have been seamlessly installed by a wide variety of ALTO Aviation authorized dealers worldwide, with most installations performed (in alphabetical order) by Banyan, CE Avionics, Clay Lacy, Constant Aviation, Duncan Aviation, GEF Aviation, Flying Colours, Gulfstream, Jet Aviation, Pentastar, Pro Star Aviation, Standard Aero, Stevens Aerospace, Superior Avionics, Trimec, West Star Aviation, and Western Jet Aviation, among other authorized installers.

ALTO Cadence™ cabin control upgrades include direct replacement (in alphabetical order) of legacy Airshow, Audio International, Baker Electronics, and Pacific Systems passenger controls, eliminating woodwork by fitting the new panels in the existing cutouts.

“This is truly a remarkable milestone for our company. We appreciate and thank all our customers for their trust and partnership in selecting ALTO for their cabin audio and cabin control upgrades on their Gulfstream aircraft. We continue our strong commitment to delivering great sound and cabin control solutions specifically designed to upgrade Gulfstream jets, resulting in unrivaled performance and customized IFE/CMS solutions that contribute to enhancing every passenger’s entertainment experience while increasing the aircraft’s value.” Kevin Hayes, Vice President of Sales and Marketing at ALTO Aviation, said.

### **About ALTO Aviation**

ALTO Aviation is an aerospace industry leader in designing and manufacturing high-end cabin audio & entertainment systems for all aircraft in Business Aviation with 25 years of experience in Business Aviation. Our products and solutions include customized premium ALTO MySound™, Inflight Entertainment Systems, Direct Replacement Passenger Controls, Public Address Systems, Bluetooth® audio, Cadence™ Cabin Management System, System Master Controllers, and ALTO Cabin Control App, sold to most major OEMs and installed by authorized retrofit companies in corporate/private/VIP jets helicopters, military, and special mission aircraft. ALTO also manufactures precision sheet metal and machined parts for multiple industries and aerospace.
