PRESS RELEASE

Las Vegas, October 18, 2023

ALTO Aviation surpasses Five hundred and twenty-five (525) Cadence™ Cabin Switch Panels installations in aftermarket business jets.

ALTO Aviation (ALTO), an aerospace leader supplier of Cabin Audio Systems, In-Flight Entertainment (IFE), and Cabin Management Systems (CMS), has announced at the 2023 NBAA-BACE Business Aviation Convention Exhibition in Las Vegas, NV, that the company has surpassed five hundred and twenty-five (525) ALTO Cadence™ Cabin Management solutions installed in a wide variety of aftermarket business jets, including Boeing, Bombardier, Citation, Falcon, and Gulfstream aircraft.

ALTO Cadence™ cabin control upgrades include direct replacement (in alphabetical order) of legacy Airshow, Audio International, Baker Electronics, and Pacific Systems passenger controls, eliminating woodwork by fitting the new panels in the existing cutouts.

Most of the installations have been performed, in alphabetical order, by Aviation Completion Innovations, Banyan, CE Avionics, Clay Lacy, Duncan Aviation, Flightstar, Flying Colours, Gulfstream, Jet Aviation, King Aerospace, New United Goderich, New World Aviation, Pro Star Aviation, Standard Aero, South Aircraft Interiors, Stevens Aerospace, Superior Avionics, Thorton Aviation, Trine Aerospace, West Star Aviation, Western Aircraft, Western Airways, and Western Jet Aviation.

ALTO Cadence™ Cabin Management System offers direct replacement passenger controls that allow functionality through discrete logic and no software, significantly reducing labor and often eliminating the need for any cabin woodwork that would typically be required when replacing existing components with a third-party solution. Cadence™ achieves this by offering a vast array of customized switch panel design options to meet the specific requirements of each aircraft.

The foundation for Cadence™ is modular, discrete switch assemblies. The modules range from one (1) to six (6) positions, including USB charging, HDMI port, Bluetooth® interface, and ordinance signage. Cadence™ is compatible with the aircraft's existing Cabin Management System and In-Flight Entertainment System. Cadence™ TSO-approved products simplify the certification process for MROs engaged in cabin retrofit solutions. ALTO defines this as maintaining "Fit Compatibility." Cadence™ switch panels are flexible, allowing the design of custom bezels and solutions when needed for atypical systems or Special Missions.

ALTO's field-proven exclusive approach to retrofit cabin management provides scalable solutions that reduce costs by preserving the cabin's woodwork. Cadence™ seamlessly blends with industry-trusted IFE equipment providers to deliver fully customized cabin control and entertainment solutions, breathing new life into an aging aircraft cabin.

"This is a remarkable milestone for ALTO. I thank all our authorized dealers worldwide for their continued trust, partnership, and support in selecting Cadence™ for their IFE/CMS upgrades and allowing us to achieve this amazing company milestone, surpassing 525 Cadence™ customized installations on unique serial numbers. Our customers inspire us to continue expanding our portfolio to customize passenger and crew controls that provide them with easy and fast installations and unrivaled performance," says Kevin Hayes, VP of Sales and Marketing at ALTO Aviation.

ALTO Aviation exhibits at booth # N5213 with a full display of Cadence™ Cabin Management System for all business aircraft, personalized demonstrations of ALTO MySound™, exclusive seat-centric audio technology, and the company's new line of side-firing subwoofers.

About ALTO Aviation

ALTO Aviation is an aerospace industry leader supplier of premium cabin audio systems and cabin management solutions with 25 years of experience in Business Aviation. Our team designs, manufactures, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation. Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide. ALTO cabin systems engineers tune each cabin onsite for maximum optimization of each installation. Over 6,000 business jets fly with ALTO Aviation components. ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries.
