PRESS RELEASE

Sterling, MA, April 1, 2024

ALTO Aviation introduces a new Cadence™ Cabin Management System retrofit solution specifically engineered for Gulfstream G200 aircraft.

ALTO Aviation, a leading aerospace supplier of certified cabin audio systems and cabin control equipment for Business Aircraft, has expanded the company's Cabin Management System offering, introducing a Cadence™ Cabin Management System (CMS) retrofit solution specifically engineered for the Gulfstream G200 aircraft equipped with an obsolete Honeywell or Collins CMS.

This solution provides fit-compatible replacement switch panels at all locations except the VIP seat and the galley locations. The cutouts at these two locations will need to be trimmed out slightly to support the additional features required for these master switch panels.

To follow ALTO's "Keep it Simple" approach, headphone audio is removed to make space for optional USB type A or type C charging ports. A Bluetooth® audio receiver is available to replace existing CD/DVD source equipment. An additional option is available to replace the existing NTSC aux panels with HDMI aux ports to interface with new HD bulkhead monitors.

"We are very pleased to serve our MRO customers by introducing this simple and effective upgrade solution designed to solve CMS obsolescence in the Gulfstream G200 aircraft. Cadence™ switch panels offer a practical CMS solution without any performance compromise and an unrivaled price point. Our authorized installers do a great job, and the installations are fast, with seamless results, easily bringing new cabin control life to this great aircraft," says Steve Lord, Senior Technical Sales Manager at ALTO Aviation.

About ALTO Aviation

ALTO Aviation is a leading aerospace industry supplier of premium cabin audio systems and cabin management solutions, and it has over twenty-six years of experience in business aviation. Our team designs, manufactures, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation.

Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide.

ALTO cabin systems engineers tune each cabin onsite to optimize each installation. Over 7,000 business jets fly with ALTO Aviation components.

ALTO also manufactures precision sheet metal and machined parts for aerospace and multiple high-standard industries. ALTO Aviation is part of the Heads Up Technologies Group.
