PRESS RELEASE For embargo until May 28, 2024

Hamburg, Germany, May 28, 2024

ALTO Aviation introduces new ALTO Cargo Intercom Audio System for cargo freighter conversions.

ALTO Aviation, a leading aerospace supplier of certified cabin audio systems and cabin control equipment for Business Aircraft, has expanded the company's components portfolio with the development of a new communication - audio system specifically designed for cargo freighter conversions.

For over 27 years, ALTO Aviation has been an industry leader in providing flightdeck and cabin Passenger Address (PA) audio systems to Business Jet OEMs, Rotor wing aircraft for search and rescue, and most recently, ALTO has teamed up with an industry leader in cargo freighter conversions to design and provide the communication/audio system for the loading crews on a B777-300ER cargo freighter. In this highly noisy environment, clear communication and intelligible audio are key to ensuring the safety of the loading crews in the aircraft, as well as on the ground. The solution is available and customizable for Boeing, Airbus, among other aircraft.

Using ALTO's field-proven ALTO Public Address PA-100 amplifier, ALTO Relay Controller RC-1054 model, a noise-reduction microphone, and ALTO loudspeakers, the Loadmaster station near the main loading door can communicate with any or all of the eight loading stations along the length of the aircraft. The Flight Deck can also call and communicate with the loading crew with extraordinary clarity and reliability.

ALTO proprietary Advanced Digital Signal Processing, noise reduction, and low distortion circuitry ensure that everyone can be heard and understood in this noisy and hectic environment, helping to create a safe and efficient atmosphere.

"As part of our customer-centric mission, we are always finding new and effective ways to provide solutions that solve all our customers' needs. We are happy to bring an intercom solution for our customers specialized in cargo conversions by offering them a reliable system with unrivaled ALTO audio quality that contributes to safety and communication efficiency," says Mark Cook, Director of Business Development at ALTO Aviation.

ALTO Aviation exhibits at Aircraft Interiors Expo in Hamburg, Germany, May 28-30, 2024, at STG Aerospace - booth #5A17.

About ALTO Aviation

ALTO Aviation is a leading aerospace industry supplier of premium cabin audio systems and cabin management solutions, and it has over 26 years of experience in business aviation. Our team designs, manufactures, and distributes premium customized cabin audio systems and Cabin Management for all aircraft types in Business Aviation.

Our solutions include ALTO Sound™ Digital Surround Sound, ALTO Soundstage™ Immersive 3D audio, VIP seat optimization, PA/Chime Systems, Bluetooth® audio, Cadence™ Cabin Management System, Cadence™ direct replacement Passenger Controls, and ALTO cabin control app. All our products are FAA TSO-C139 approved and are sold to most major OEMs and successfully installed by leading MRO companies worldwide. ALTO cabin systems engineers tune each cabin onsite to optimize each installation. Over 7,000 business jets fly with ALTO Aviation components.

ALTO is part of Heads Up Technologies Group. For more information, please visit www.altoaviation.com or contact Cristina Scarlata at cscarlata@altoaviation.com
